

## Latest Clinical Trial Results

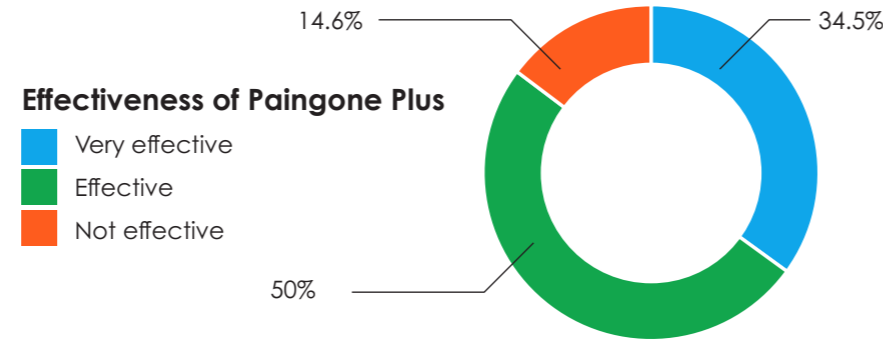

To evaluate the efficacy of Paingone pen, used on demand for 28 days, for relief of acute and chronic pain.

### How effective is Paingone Plus?

In 2017, the therapy of the original Paingone One device was the subject of a double-blind, placebo-controlled clinical trial. The trial concluded that the therapy "is effective in relieving chronic musculoskeletal pain".

In 2020, Paingone Plus was the subject of a customer satisfaction survey.

Half of users reported that Paingone was effective and a further 25% of all users found Paingone Plus to be very effective.

## freeze FROM paingone

Freeze gel is the topical cooling gel from Paingone. It feels like the cold therapy you get from an ice pack but it absorbs quickly and lets you get on with your day.

Many people use hot and cold therapies for treating aches, pains, sprains and you may have even heard of the "R.I.C.E." method (Rest, Ice, Compression, Elevation). Freeze gel provides the 'PORTABLE' version of that bag of ice; ideal for a gym bag or just using daily on areas of pain. The 4% menthol formula rapidly delivers soothing relief to painful muscles, Joints, Sprains, Strains, Backache, Arthritis.

### It is especially good for use on:

Backs, Shoulders, Knees, Wrists, Ankles and other aching, painful areas.

### Applying Freeze gel couldn't be simpler:

Place a small amount of the gel on the affected area. Apply directly on the skin. Massage gently in circular motions until the gel has been absorbed. Repeat the above process to treat other painful areas. Apply as necessary throughout the day up to 4 applications per day. The cooling effect is often felt within moments and typically lasts up to 2 hours. Not to be used on children under 12 years old.

### Freeze gel offers BIG value

Freeze gel is supplied in a big tube, offering twice the volume of gel as some competitors but at a lower retail price. And all this while still delivering the same quality formulation and 4% menthol concentration that really cools and relieves pain.

# Gets Straight to the Point of Pain

# paingone

## Helps Write Off Pain

### Who should use Paingone?

Anyone suffering from physical pain. Best sales results can be achieved by targeting those who suffer long-term acute or chronic pain. Generally, those aged 50+ are more likely to suffer from regular pain and will be most receptive to Paingone.

### What conditions can Paingone help with?

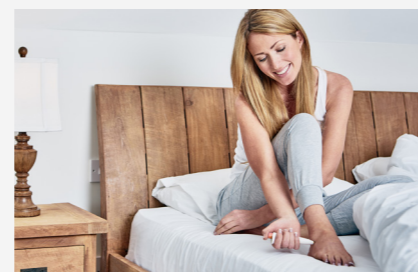

Arthritis, sciatica, back pain, osteoporosis, spondylosis, rheumatism, joint pain, migraine, gout, inflammation and stiffness, tennis elbow, sports pain and more. In summary, most physical pain.

### Demonstrating Paingone:

- Hold Paingone Plus in your hand as illustrated in the image
- Ensure that your hand makes firm contact with the metal ring. If contact is not made, Paingone Plus will not be effective.
- Identify the area of pain and place the Paingone Plus over the point of pain. Bring the tip of the device in contact with the skin

- Press and hold down the activating button for 30 seconds
- Paingone Plus sends a pulse that activates endorphins, the body's natural defense against pain
- Repeat treatment as often as necessary. You cannot overdose
- For best results use Paingone Plus on a regular and consistent basis

## Frequently Asked Questions

### How does it work?

Paingone transmits electrical impulses that stimulate the nerve fibers, lying below the skin's surface. The nerve pathway sends a message to the brain, which responds by sending endorphins (the body's own natural painkillers) to stop the pain. Pain is relieved or disappears.

### Is it safe?

Paingone is an FDA approved class 2 medical device. Its therapy has been tested in successful clinical trials. Today, over 1.9 million Paingone units have been sold worldwide, a major endorsement of its effectiveness

### It gives a 'shock', is this right?

The Paingone sends out small controlled electrical pulses. Some users might feel a tingling sensation. If the feeling is uncomfortable, use the Paingone through light clothing or a towel or dish cloth. This will mute the sensation.

### Can someone else use the Paingone on me?

Yes. The partner should then hold the Paingone ensuring their index finger is touching the metallic conductive strip and with the free hand, hold one of the patient's hands.

## The Key to Optimising Sales in Retail

Point of sale materials offer customers a "free pain relief treatment" in-store.

You want customers to ask for a product demonstration. 7 in 10 pain sufferers who receive the demonstration go on to buy Paingone.

As soon as customers have shown interest in the product, ask them to explain the pain that they are suffering from. Then show how Paingone can be applied to treat exactly this type of pain.

Explain that Paingone:

- ✓ Is FDA approved
- ✓ Works for most types of pain
- ✓ Has sold over 1.9 million units around the world
- ✓ Is Drug-free
- ✓ Takes just 30 seconds to apply

Equally, if you have customers who have reported positive experiences with the Paingone, relay these experiences to new customers.

**7 out of 10 people that try Paingone in store buy it!**

## Frequently Asked Questions

### How long before I feel the benefit?

In many cases, Paingone will provide relief almost immediately or within a few days. However, to feel the full benefit of Paingone, it is advisable to use the product for at least two weeks.

### Can anyone use Paingone?

Do not use Paingone if you have a cardiac pacemaker, implanted defibrillator, or other implanted metallic or electronic device. Do not use if you have epilepsy.

### Is Paingone guaranteed?

Yes. Paingone carries a two-year warranty against malfunction.

### How long will Paingone last?

Paingone is powered by one AAA battery. Each battery provides over 1000 applications. Simply replace the battery as needed to continue using the device.
